2 WIRES
Company Profile

Profile

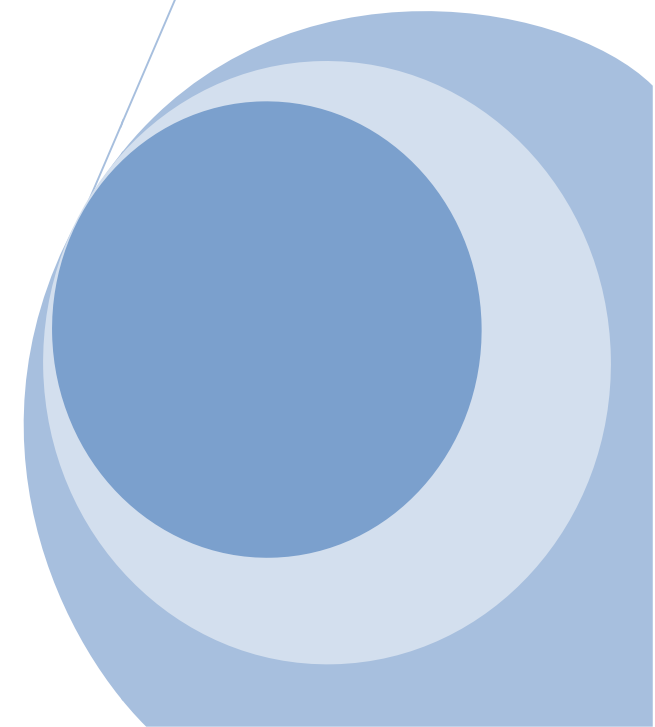

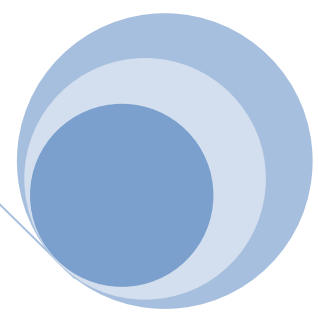

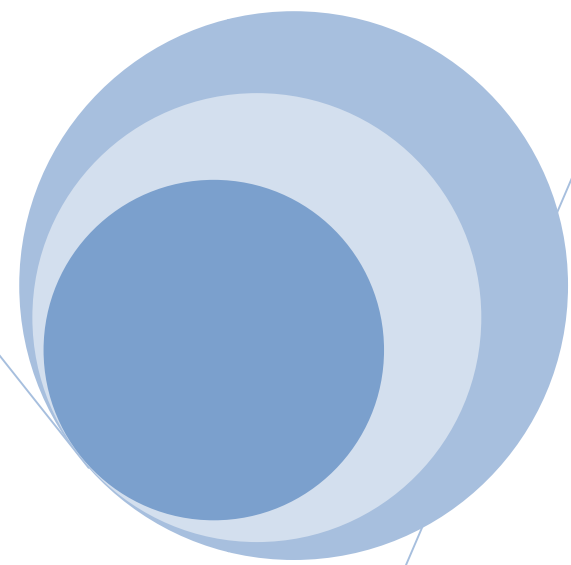

2Wires Company established in 1997 is a reputable Egyptian Contracting Company based in Cairo. 2Wires Company has a great outstanding contracting experience; it is specialized in Air Conditioning, Electrical Works, Testing & Commissioning of all Electro-Mechanical machines & Equipments, Safety & Fire Fighting, HVAC Systems & Technical Installations.

2Wires Company has developed immensely throughout the years and has increased its resources. 2Wires has established a Duct Technology Factory for manufacturing of sheet metal, HVAC, duct works & supplying accessories. Thus, providing a very superior quality of products and services to meet all the customers' requirements. The Company's improvement is due to its team of professional and competent engineers, who offer high quality designs, supervision and execution of first class quality finishing, renovation works with a large scope of electro-mechanical projects.

2Wires Company selects its individuals who are exceptionally qualified, professional, reliable and efficient who not only excel in their fields, but who are passionate about their work. Their passion drives them to accomplish work at an outstanding level in contracting, installing and servicing in order to meet the complete satisfaction of our clients.

Eng. Ossama Adib

Chairman

• Company Profile •

2 Wires – TESTING & BALANCING SERVICES DEPARTMENT is specialized in testing, adjusting, and balancing of heating, ventilating, air-moving equipment, air-conditioning systems and hydraulic systems.

The Company's improvement is due to its team of professional and competent engineers, who offer high quality designs, supervision and execution of first class quality finishing, renovation works with a large scope of e testing projects.

Also we have the latest versions of the testing and balancing instruments which give us the ability to complete our works perfectly

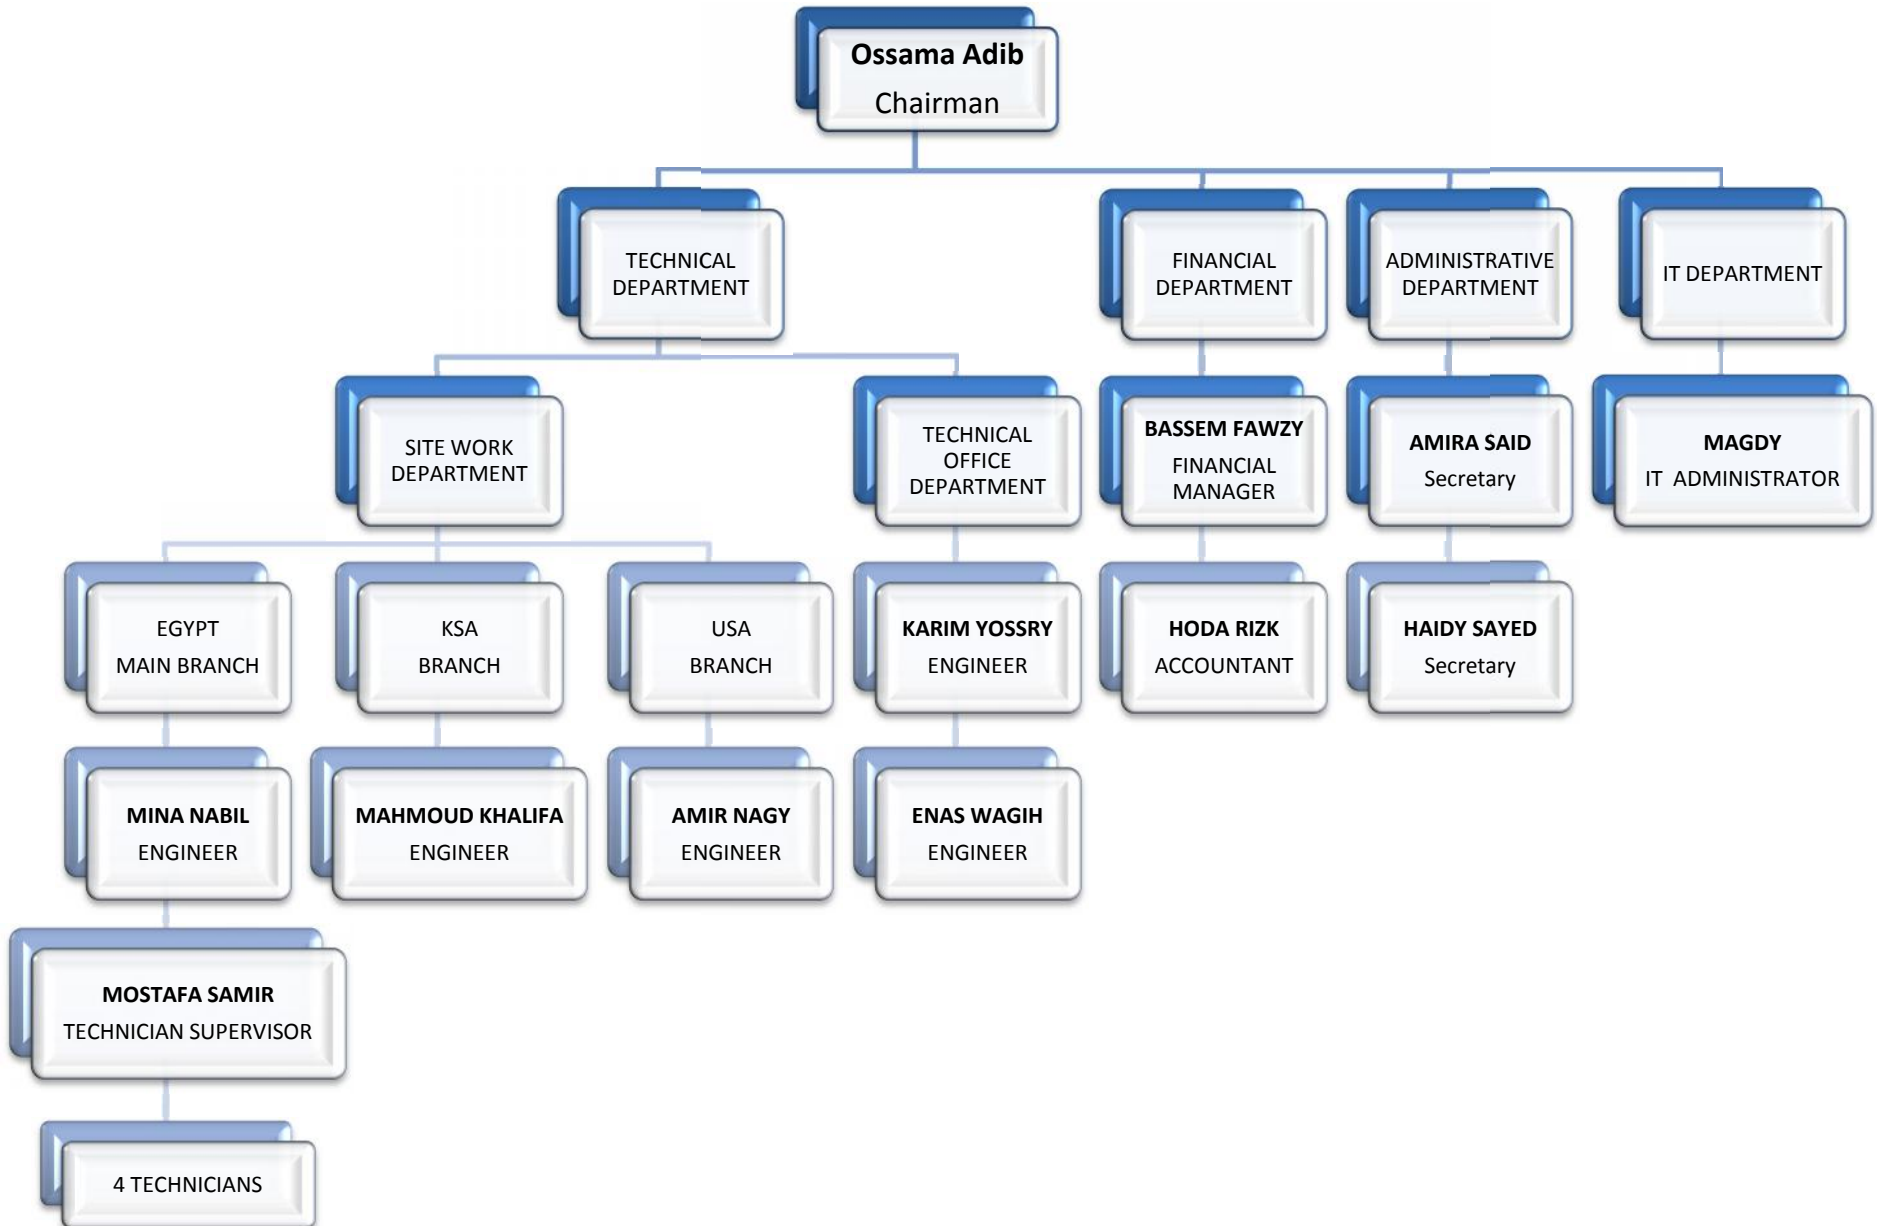

We follow the instructions and procedures of the associated air balance (AABC) to:

- Ensure that proper methods and procedures are followed in the test and balance process
- Provide a better understanding of the scope of work required
- Work with design professionals to achieve design intent

2 Wires selects its individuals who are exceptionally qualified, professional, reliable and efficient who not only excel in their fields, but who are passionate about their work. Their passion drives them to accomplish work at an outstanding level in order to meet the complete satisfaction of our clients.

**RE: TESTING AND COMMISSIONING REF PROJECTS FOR
2 WIRES Co.**

Dear Sir,

With ref. to the above-mentioned subject we would like to declare as an HVAC consultant that "2 wires" had been involved in some of our projects and have done a very professional, respective work in the expected period of time for the testing and commissioning of the HVAC systems.

This has been achieved during the last 7 years in the following projects.

No.	Project Name
1	Main conference hall - New cairo
2	Health Club – 6 th October
3	CIB Giza Branch –Giza
4	Sonesta Hotel-Cairo
5	Governmental administration Bldg – Alex
6	Entertainment bldg - New Opera- Cairo

This certificate was given to 2 wires upon their request with no legal obligation on AHC consultant.

Sincerely Yours
Mechanical Section Head

Hany srour

Hany srour

To whom it may concern

Uhde GmbH, a member of the ThyssenKrupp group of companies, is contracted by EPPC to construct an PDH/PP Complex Factory in Port Said, Egypt.

During the period of commissioning work of the HVAC systems Two Wires has successfully completed the Air flow Measurements of the different HVAC systems.

The work showed the application of technical and quality standards. Two Wires proved to be experienced, co-operative and capable to emit the assigned responsibilities.

Our joint work and meetings are impressed by a fruitful and successful co-operation atmosphere on an high technical level standard.

Due to the quality of Air flow Measurements we highly recommend them.

This certificate has been issued upon Two Wires's request with no responsibility to our company.

9.7.2010 
Dr. Frank Seidemann
Lead Engineer HVAC

Duct Technology

**THE LEADER IN EGYPT FOR SHEET METAL
MANUFACTURE AND ACCESSORIES**

DUCT TECHNOLOGY Factory is specialized in manufacturing of sheet metal for HVAC duct Works and suppliers for accessories.

We are Suppliers for the largest companies in the world:

(1) Duro Dyne Co. (the greatest name in sheet metal necessities in (USA).

(2) Lead' Air International Co. (the leader in Europe for sheet metal supplies and accessories).

(3) PAL International Co. for (pre-insulated foam ducting).

We established a factory for duct technology and imported a PRO-FABRICATE DUCT machine (U.S.A made) for making HVAC ducts according to standard and specification of SMACNA; these ducts are with different kind of special joints profiles such as:

- 1: TDC transverse joint (flanged).
- 2: Slip and drive transverse joint.
- 3: Slip on flange joint.

As standard SMACNA Duct Joint.

We have also imported a new version of PLASMA CUTTING machine (U.S.A.made) with the latest technology first time in Egypt, to do shapes and models to complete all the requirements for duct lines.

DUCT TECHNOLOGY Factory is unique in speed, quality and advanced technology as the work is run through 24hrs a day producing 20 tons of sheet metal duct lines varied by (thickness, dimensions).

This enlargement of our production line was due to comply with the increased demand and to fulfill our customers' requirements; having proved ourselves in the local market due to our outstanding performance, professional and efficient personnel and engineers.

Chair man
Eng.ossama adib

EMPLOYEES:

DUCT TECHNOLOGY is a team of professional and competent Engineers and foreman, who offer high quality Products with advanced finishing and services.

The staff includes:

- 5 specialized B.Sc. Engineers who were highly trained under specialized Americans consultants.
- 6 full time foreman.
- 40 steel and duct fixers.
- 2 Accountants.
- 2 Sales men.
- 4 Store keepers.
- 10 Workers.

The staff consists of honest, qualified and professional individuals, managed by an equally reliable and efficient administration.

Sister Company:

2 Wires Company for Electromechanical works and Duct technology Factory are working under Management of One chairman Eng.ossama adib.

Main office and show room:

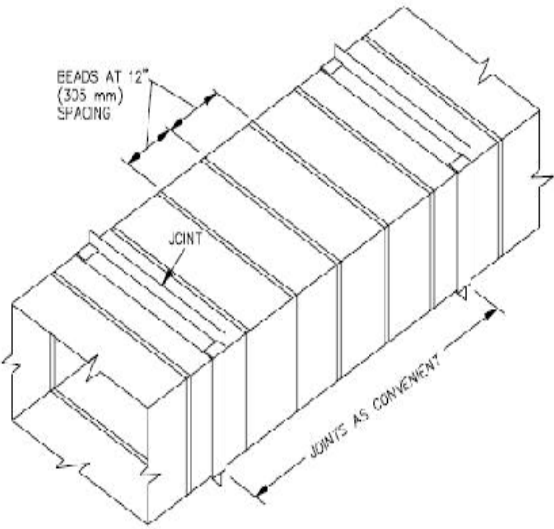

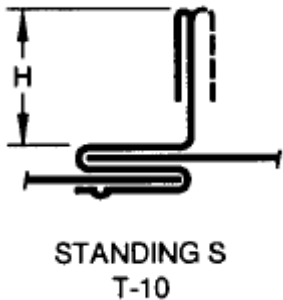

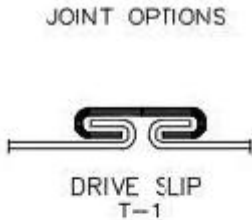

36 said Ghareeb division, El Salam city, Cairo
Mobile: 0100081495- 0100081042-0107771980.
Tel.:+202 26971069
Fax. +202 29671070
Email:info@ducttechnology.COM
Web. Site: WWW.ducttechnology.COM

Duct Technology provides three techniques for manufacturing ducts according to SMACNA.....

1. Slip & Drive transverse joint

Duct length: 1.22m

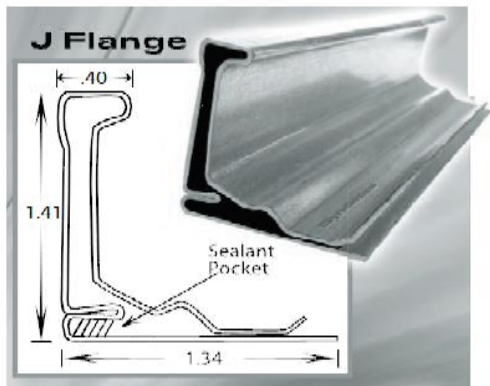

Recommended for the small sizes of ducts from 0- 18 inch.

2. Slip on flange technique

In this technique ducts formed and we install flanges on it, we supply American (duro dyne) profile A35 and Belgian (lead'air) profiles according to following table

Duct length: 1.25m

profile	Low pressure		medium pressure		high pressure	
	A max	A+B max	A max	A+B max	A max	A+B max
E20-A20	1450	2500	1250	2000	1000	1500
E30-A30	2250	3750	2000	3000	1500	2500
A40	4000	6000	3000	5000	2500	400
Clamps	X= max 600mm		X= max 500mm		X= max 400mm	

Belgian (lead'air) profiles

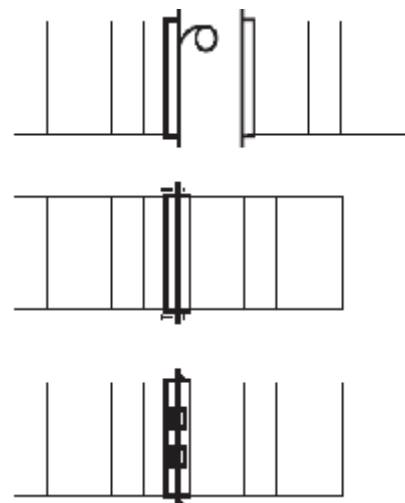

In this technique Rectangular duct must be assembled according to these instructions:

○ BEFORE ASSEMBLY

The ducts must be free from dirt.

○ Assembly instructions:

- Only use undamaged rectangular duct and fittings.
- Apply continuous gasket to effectively seal flanges and corners.
- Fasten the duct and fitting together with bolts & nuts at four corners.
- Mating flange shall be locked together by duct clamps.

- The following numbers of duct clamps are recommended:

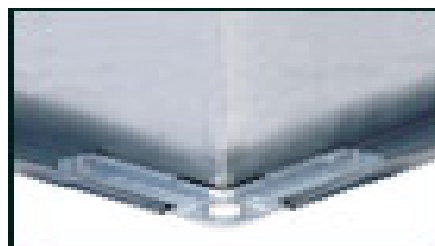

duct dimension mm	number
0 - 200	0
250 - 400	1
450 - 600	2
650 - 800	3
850 - 1000	4
1050 - 1200	5
1250 - 1400	6
1450 - 1600	7
1650 - 1800	8
1850 - 2000	9
2050 - 2200	10

3. Flanged (T.D.C) technique

In this technique flanges formed from ducts and we install corners and clamps

Duct length: 1.15m

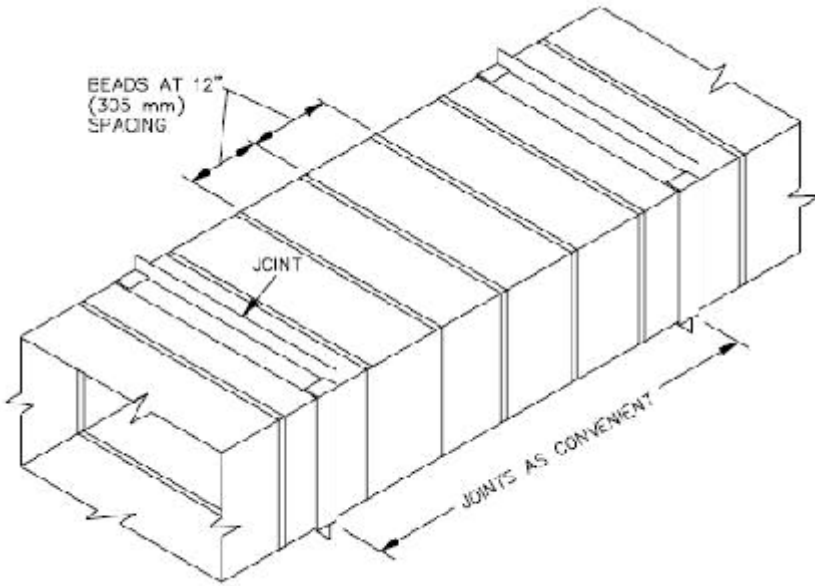

**FLANGED
(WITH GASKET)
T-25a**

1. Straight ducts

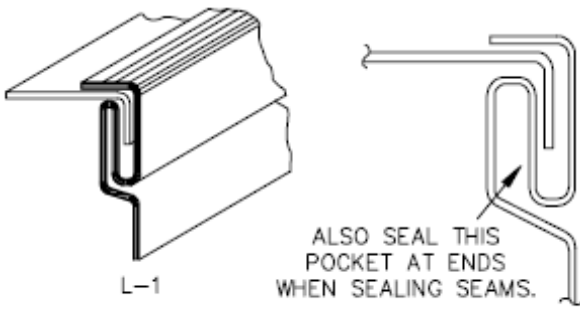

All straight ducts are beaded at equal spacing (305mm) according to SMACNA

Longitudinal Seam

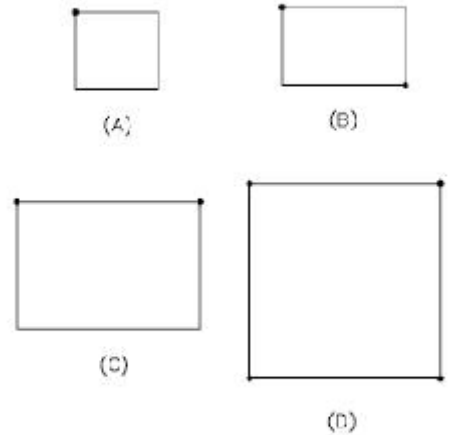

Pittsburg lock

This type consists of male side (9mm) & female side (35mm)

PITTSBURGH LOCK

SEAM LOCATIONS

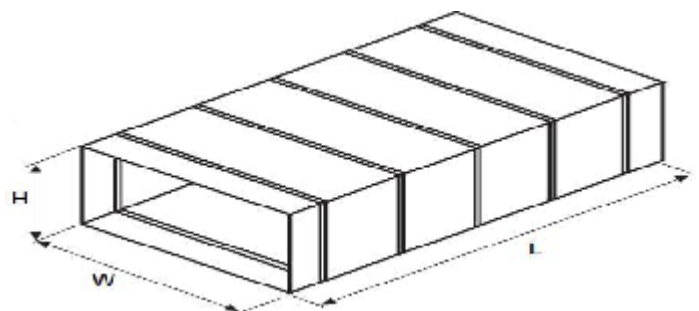

NUMBER OF SEAMS AND LOCATION VARIES WITH JOINT TYPE, SHEET ROCK AND ASSEMBLY PLANS.

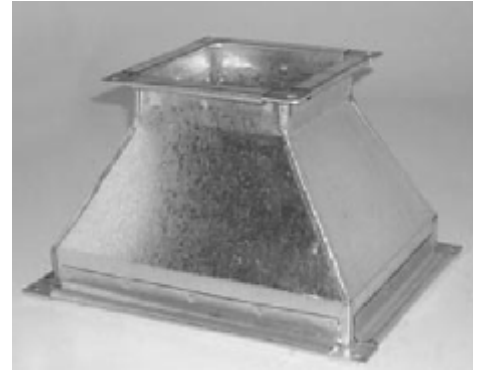

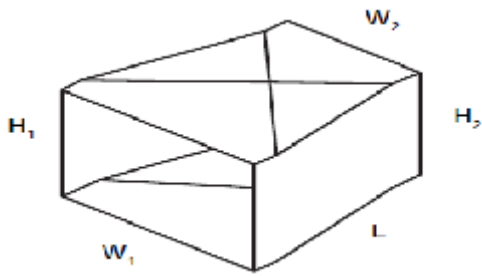

* Seam numbers and locations vary according to joint type and size.

Ordering

Duct W x H x L

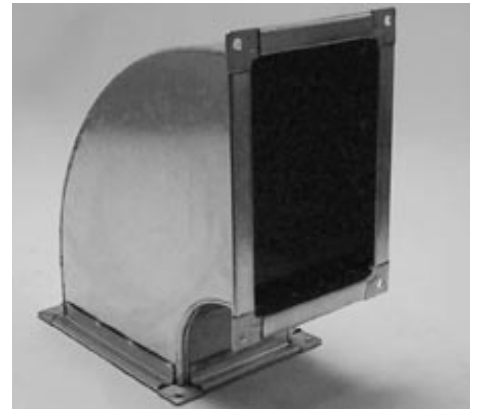

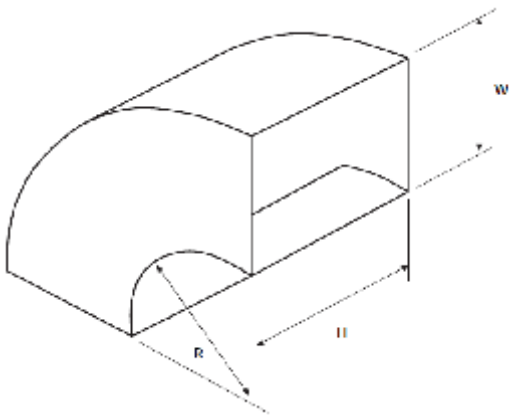

2. Reducer

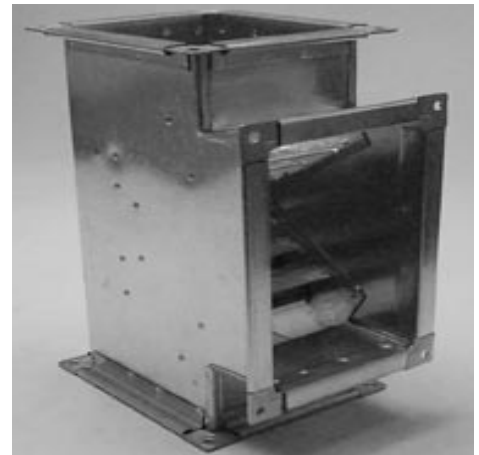

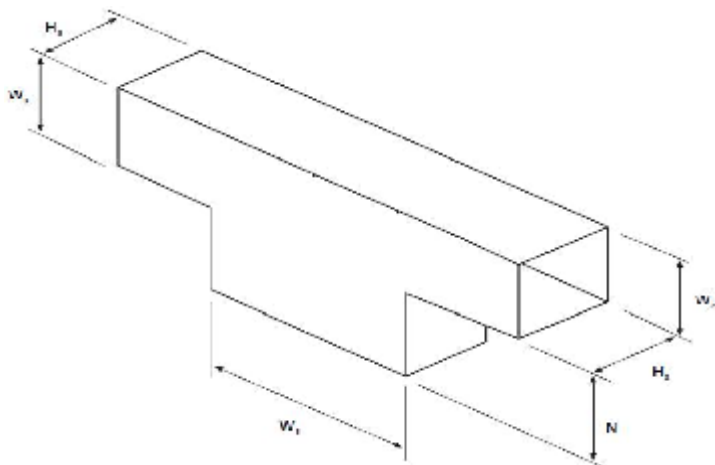

Order reducer $W_1 \times H_1 / W_2 \times H_2$ with length L

3. Radius Bend

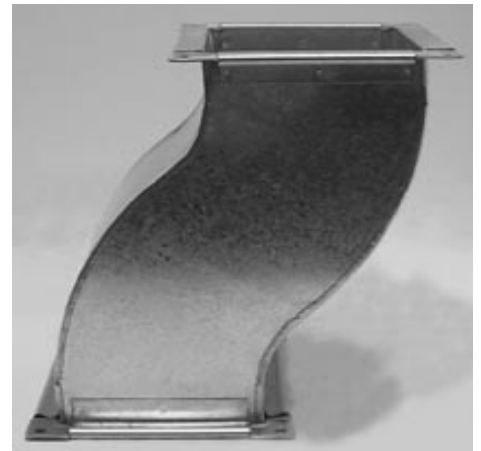

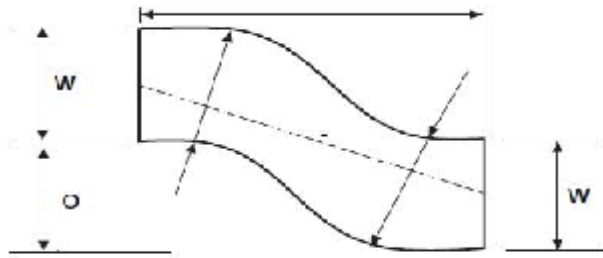

Ordering Radius bend $W \times H$ with radius or throat R

4. Tee

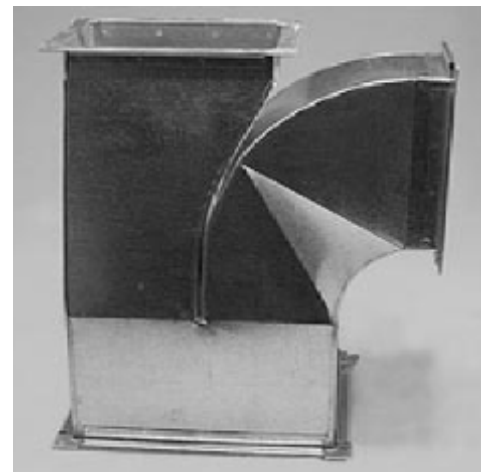

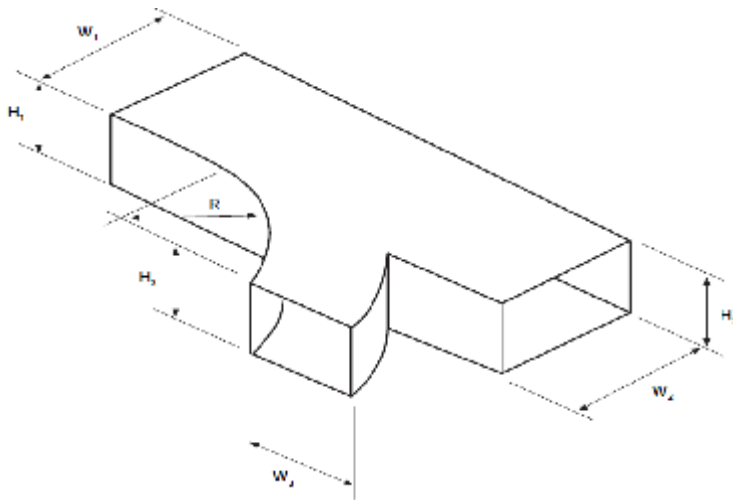

Ordering Tee $(W_2 \times H_2) (W_3 \times H_3) / (W_1 \times H_1)$ with throat N

5. Offset (S shape)

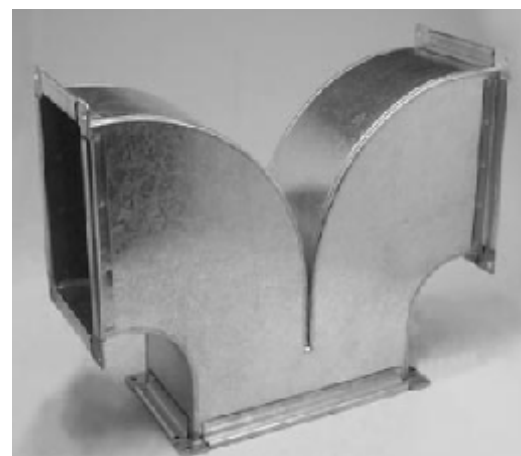

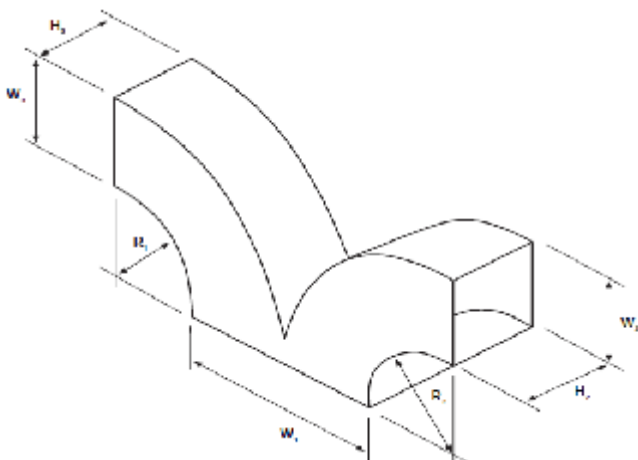

Ordering Off W x H x O x L

6. R-fitting or parallel flow branch

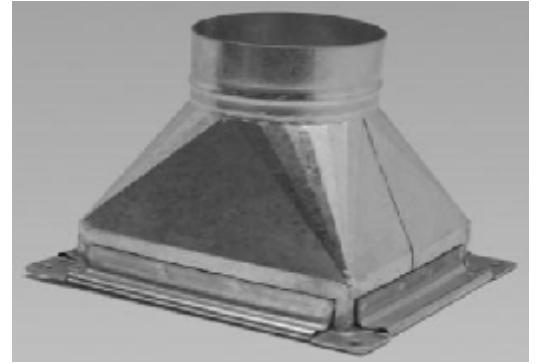

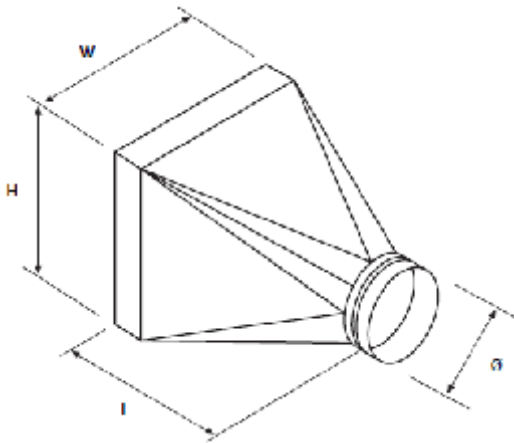

Ordering RF (W2 x H2) (W3 x H3) / (W1 x H1) with radius R

7. Split bend

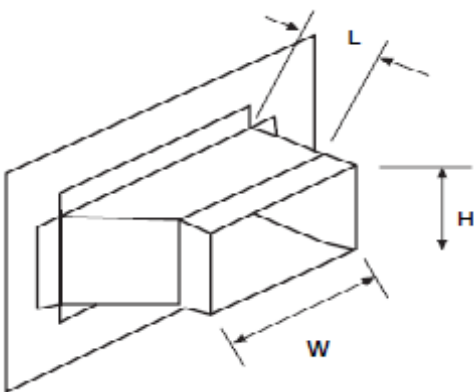

Ordering SB (W2 x H2) (W3 x H3) / (W1 x H1) with radius R1 and R2

8. Transition, rectangular to round.

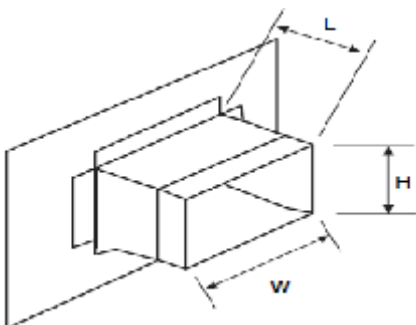

Ordering Trans (W x H) / Ø with length L

9. Take off 45°

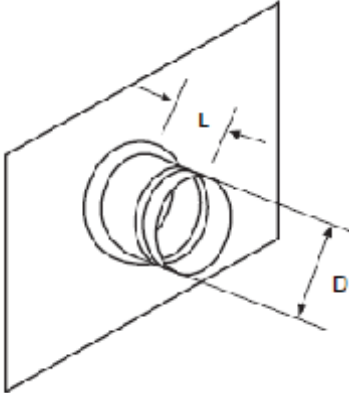

Ordering TO 45° (W x H) with length L

10. Take off 90°

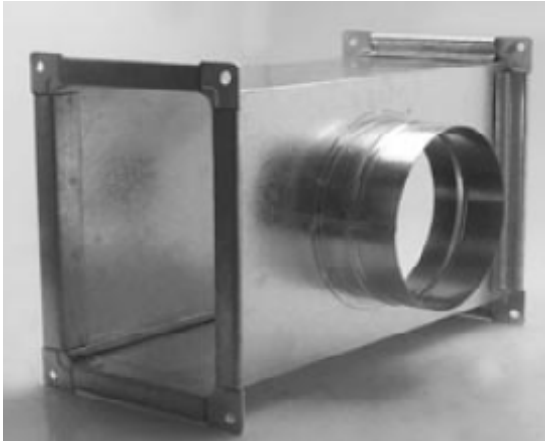

Ordering TO 90° (W x H) with length L

11. Round Branch connection /take off

Ordering RB (D) with length L

Machines and equipments

Duct technology is unique in Egypt with its machines with high technology in manufacturing ducts.

Pro fabricate duct machine

Produced by **Iowa Precision Industries (U.S.A.)**, the leader in custom designed and manufactured automated coil processing systems, has the experience and proven know-how to develop systems meeting the specific goals of customers, worldwide.

- Produces commercial and residential ducting
- Modular design with 11 integrated flexible workstations
- Notches vees and corners
- Forms Pittsburgh, TDC, slip & drive seams and joints
- Automated production control with integrated PC
- Operator programmable. The controller will store up to 100 programs for easy recall
- Modem included for remote factory support
- Processes flat sheets, 4-piece duct, "L" duct sections, "U" duct sections and wrap around duct sections

L-Duct sections with TDC flanges and Pittsburgh seam

Plasma cutting machine (Vulcan® 1000D)

Produced by Lock former (U.S.A.) The leader in the production of roll forming equipment.

For more than 65 years, Lock former® has led the world in the production of roll forming equipment. While the heating, ventilation and air conditioning (HVAC) industry is the company's primary market, Lock former® continues to expand into new areas.

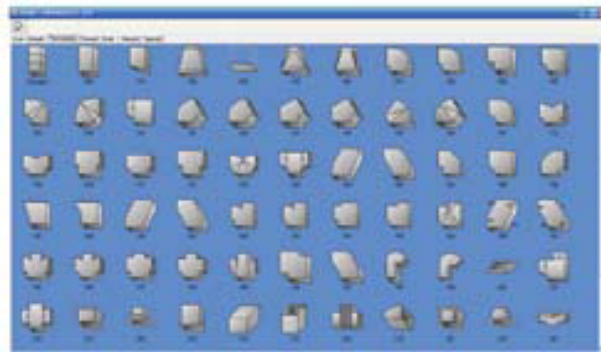

LOCKFORMER

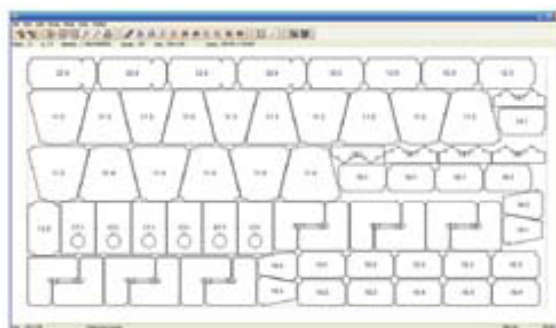

The Vulcan 1000D
Plasma Cutting System

Vulcan software makes you work more productive whether you have five or fifty people in your shop. Fitting input is quick, simple, and non-repetitive. Create customized, color-coded labels and reports easily.

Comprehensive Fitting Libraries: Choose from our comprehensive library of fittings from residential to the largest industrial applications.

Automatic Shape Nesting: Reduce scrap levels significantly with automatic shape nesting. Go from blanking out each fitting to blanking out an entire job.

Accessories Division

Duct technology is agent for the two largest companies in the world:

- (1) **Duro Dyne Co.** (the greatest name in sheet metal necessities in (USA).
- (2) **Lead' Air International Co.** (the leader in Europe for sheet metal supplies and accessories).

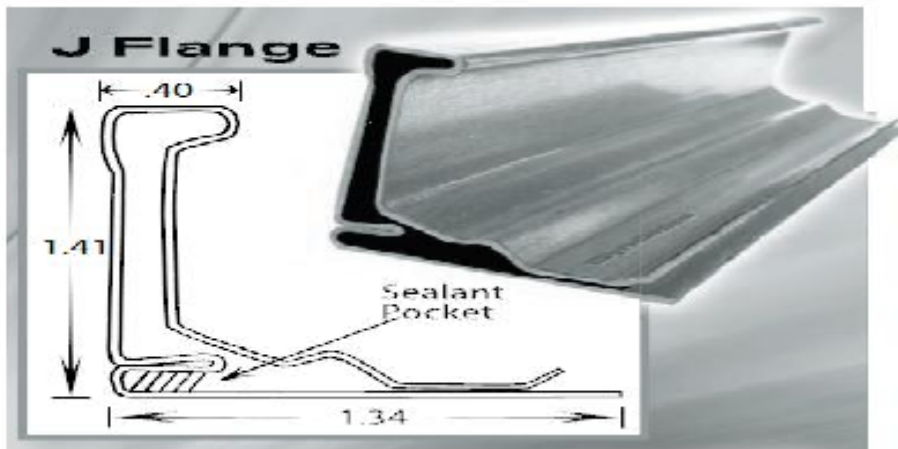

Flange & Cleats From DURO DYNE

DYN-O-MATE FLANGES

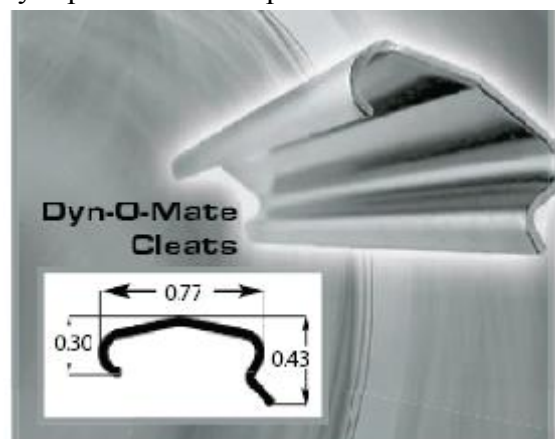

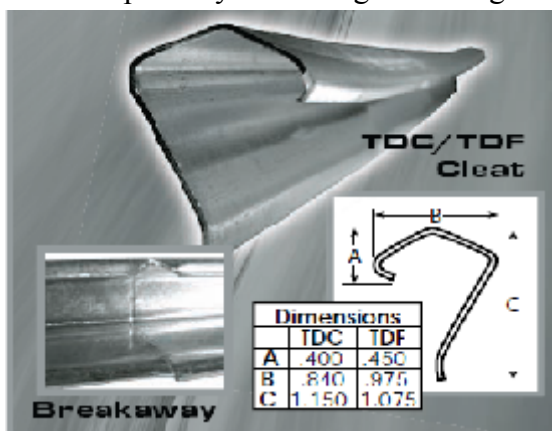

DOMJ Flange

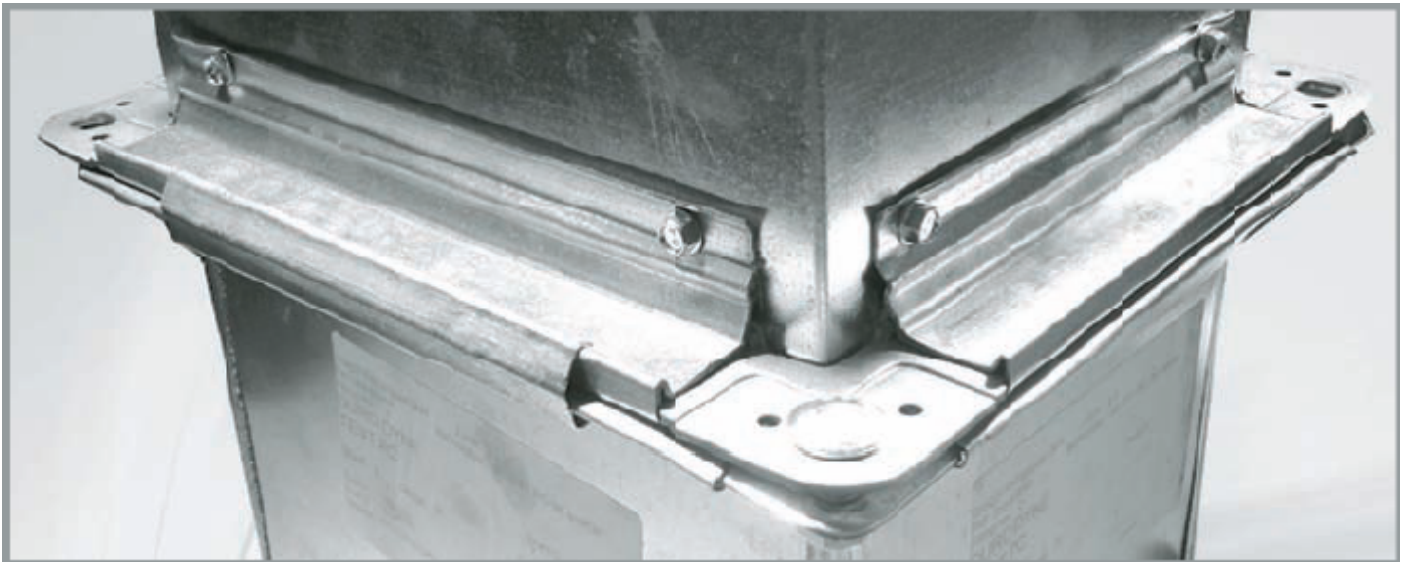

- Designed to strengthen the duct wall and connect duct sections together.
- Furnished with an integrated sealant pocket for a secure air tight fit.
- Manufactured from 20-gauge steel in 12ft. length.
- DOMJ is designed for large commercial and high-pressure applications.

DYN-O-MATE CLEATS

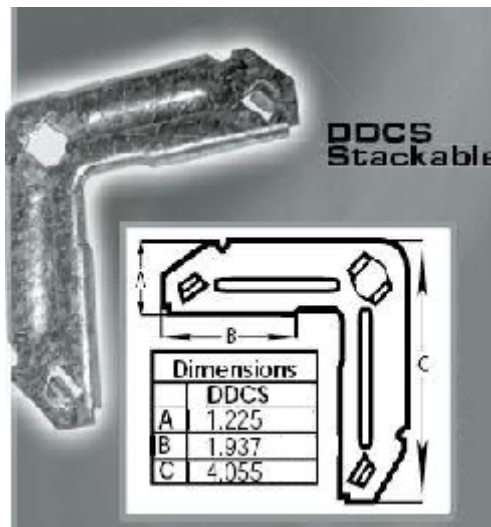

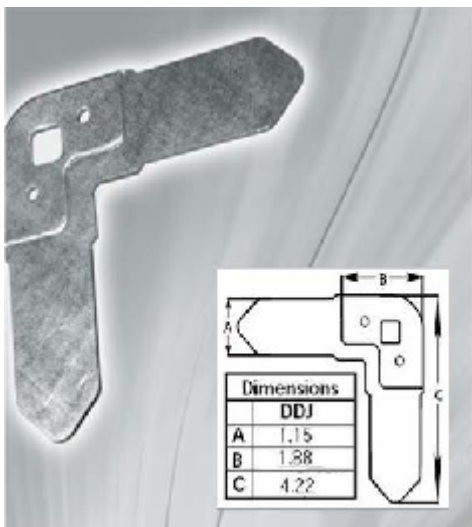

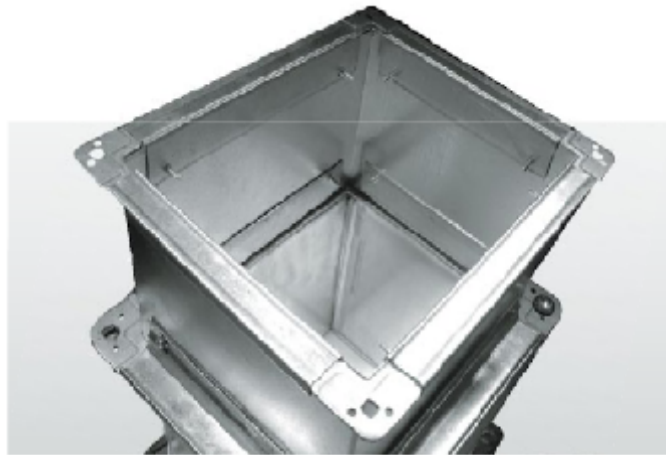

- DOM-CLT and TDF-CLT are manufactured from 20 gauge galvanized steel 6" pieces.
- TDC/TDF-2230 is 22 gauge steel formed into lengths of 30" long and divided into five 6" cleats that are partially cut through allowing them to be easily separated into 6" pieces.

Corners

- DDJ corners are manufactured from 11-gauge steel for use with DOMJ Flange.
- DOMC corners are manufactured from 16-gauge steel.
- DDCS (TDC) corners are for use in corner insertion machines and are manufactured from 16-gauge steel.

DYNA-TITE SYSTEM BENEFITS from DURO DYNE.

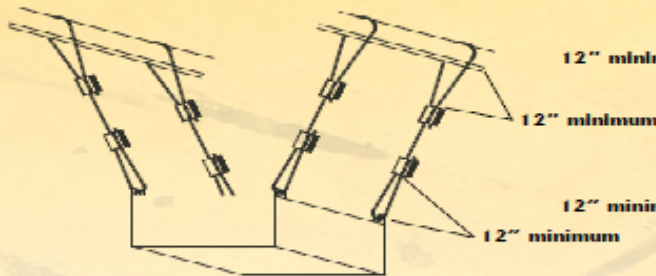

- Its time saving qualities have been shown to reduce installation by up to 6 times compared to traditional threaded rod.
- It provides a fast and strong solution to the task of hanging Mechanical and HVAC Systems.
- It allows the installer to position the hangers vertically or at an angle to the suspended object.
- Dyna-Tite System is lightweight and easy to carry, and combines these qualities with the inherent strength of high tensile wire rope.
- Its light weight improves safety on the job. Carrying the product on the job site is easy and, in aerial situations reduces accident risk caused by falling materials.

DYNA-TITE CABLE LOCKS

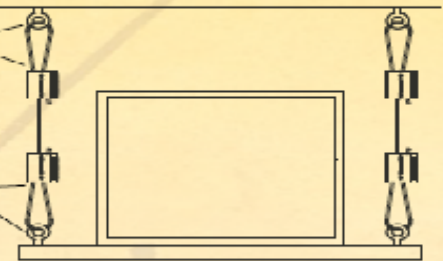

APPLICATIONS

Dyna-lite cable locks and wire rope can be used for suspension in a variety of ways to accommodate most mechanical & HVAC construction applications.

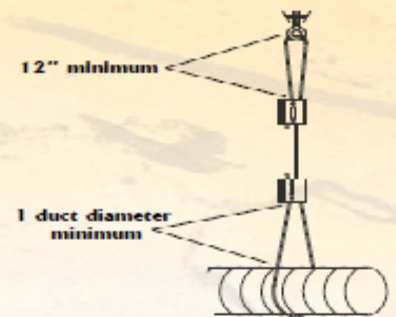

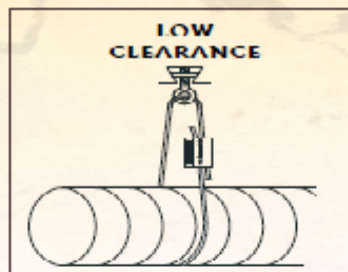

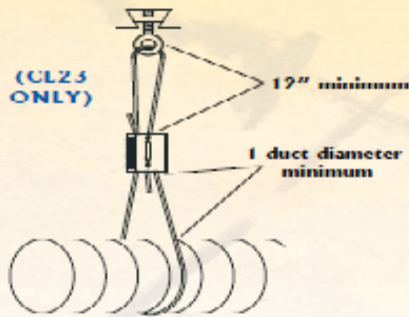

UNIT HANGING

RECTANGULAR DUCT WORK

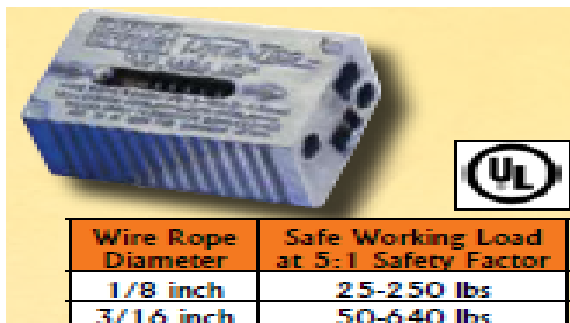

SPIRAL DUCT WORK

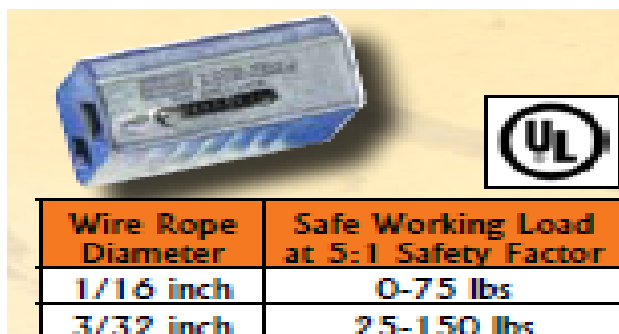

CL23 Cable Lock

- The Maximum Load Range for each size wire rope incorporates a design safety factor of 5:1. The CL23 and wire rope combination should be sized for the job so that the projected load falls within the appropriate working load limit (WLL).
- Wire Rope for use with CL23 is supplied in rolls. The 1/8 inch comes in 500 foot rolls. The 3/16 inch wire rope is supplied in 250 foot rolls. (1/8 inch wire in 250 foot rolls and 3/16 inch wire in 125 foot rolls is available on special order.)

CL12 Cable Lock

- The CL12 is designed for use with either 1/16 inch or 3/32 inch wire rope. The wire rope is available in 500 foot rolls. As with all Dyna-Tite cable locks, the CL12 includes release pins for easy adjustment. The CL12 is the perfect product for hanging smaller diameter spiral (less than 24 inches), typical residential and light commercial ductwork, and air handlers in attics.

Cut-away section showing the Cable Lock internal components

ZINC HOUSING

Zinc alloy combines major anti-corrosion properties with strength while providing consistent manufacturing quality.

SERRATED TEETH

Each pawl makes contact with the rope using serrated teeth. These press onto the wire rope and spread the load across the length of the pawl, maximizing the grip strength.

WIRE ROPE ENTRY

The wire rope is inserted into the Dyna-Tite channel.

STAINLESS STEEL SPRINGS

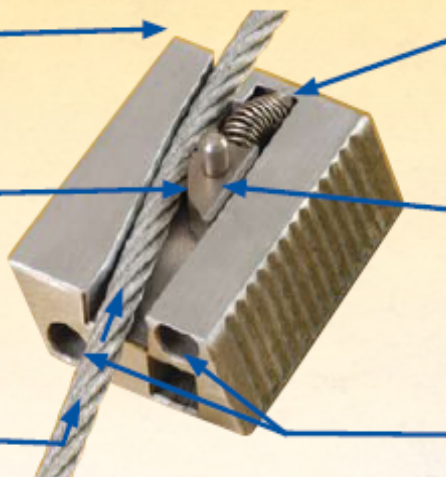

The springs, one in each channel, are manufactured of stainless steel.

LOCKING PAWLS

One sintered steel locking pawl is seated in each channel. Every locking pawl incorporates a release pin for easy adjustment after installation.

THROUGH HOLE (only on CL23)

Two "through holes" allow fast and secure hanging with only one Cable Lock.

Flexible duct connector from DURO DUNE:

INSULFLEX

DUCT ACCESS DOORS

Features:

- *22gage galvanized steel construction.*
- *Saves time and is easy to position.*
- *One inch wide gasket frame for fasting and sealing integrity.*
- *Door insulated with one inch thick fiber glass.*

Pre-insulated Ducting Technology:

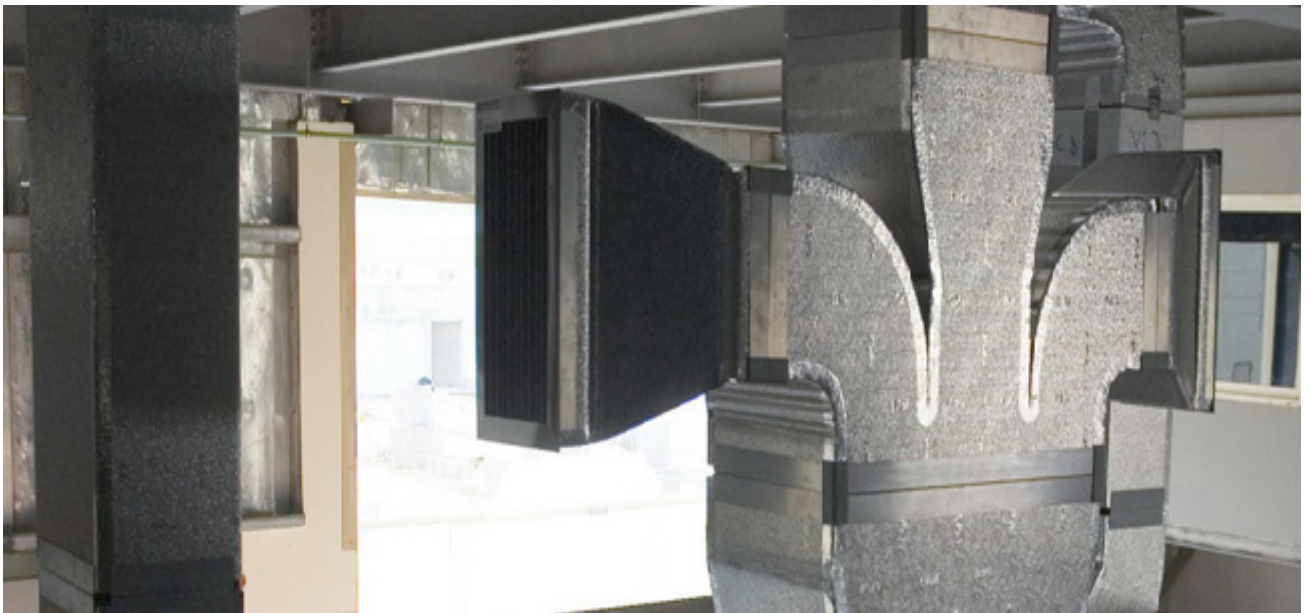

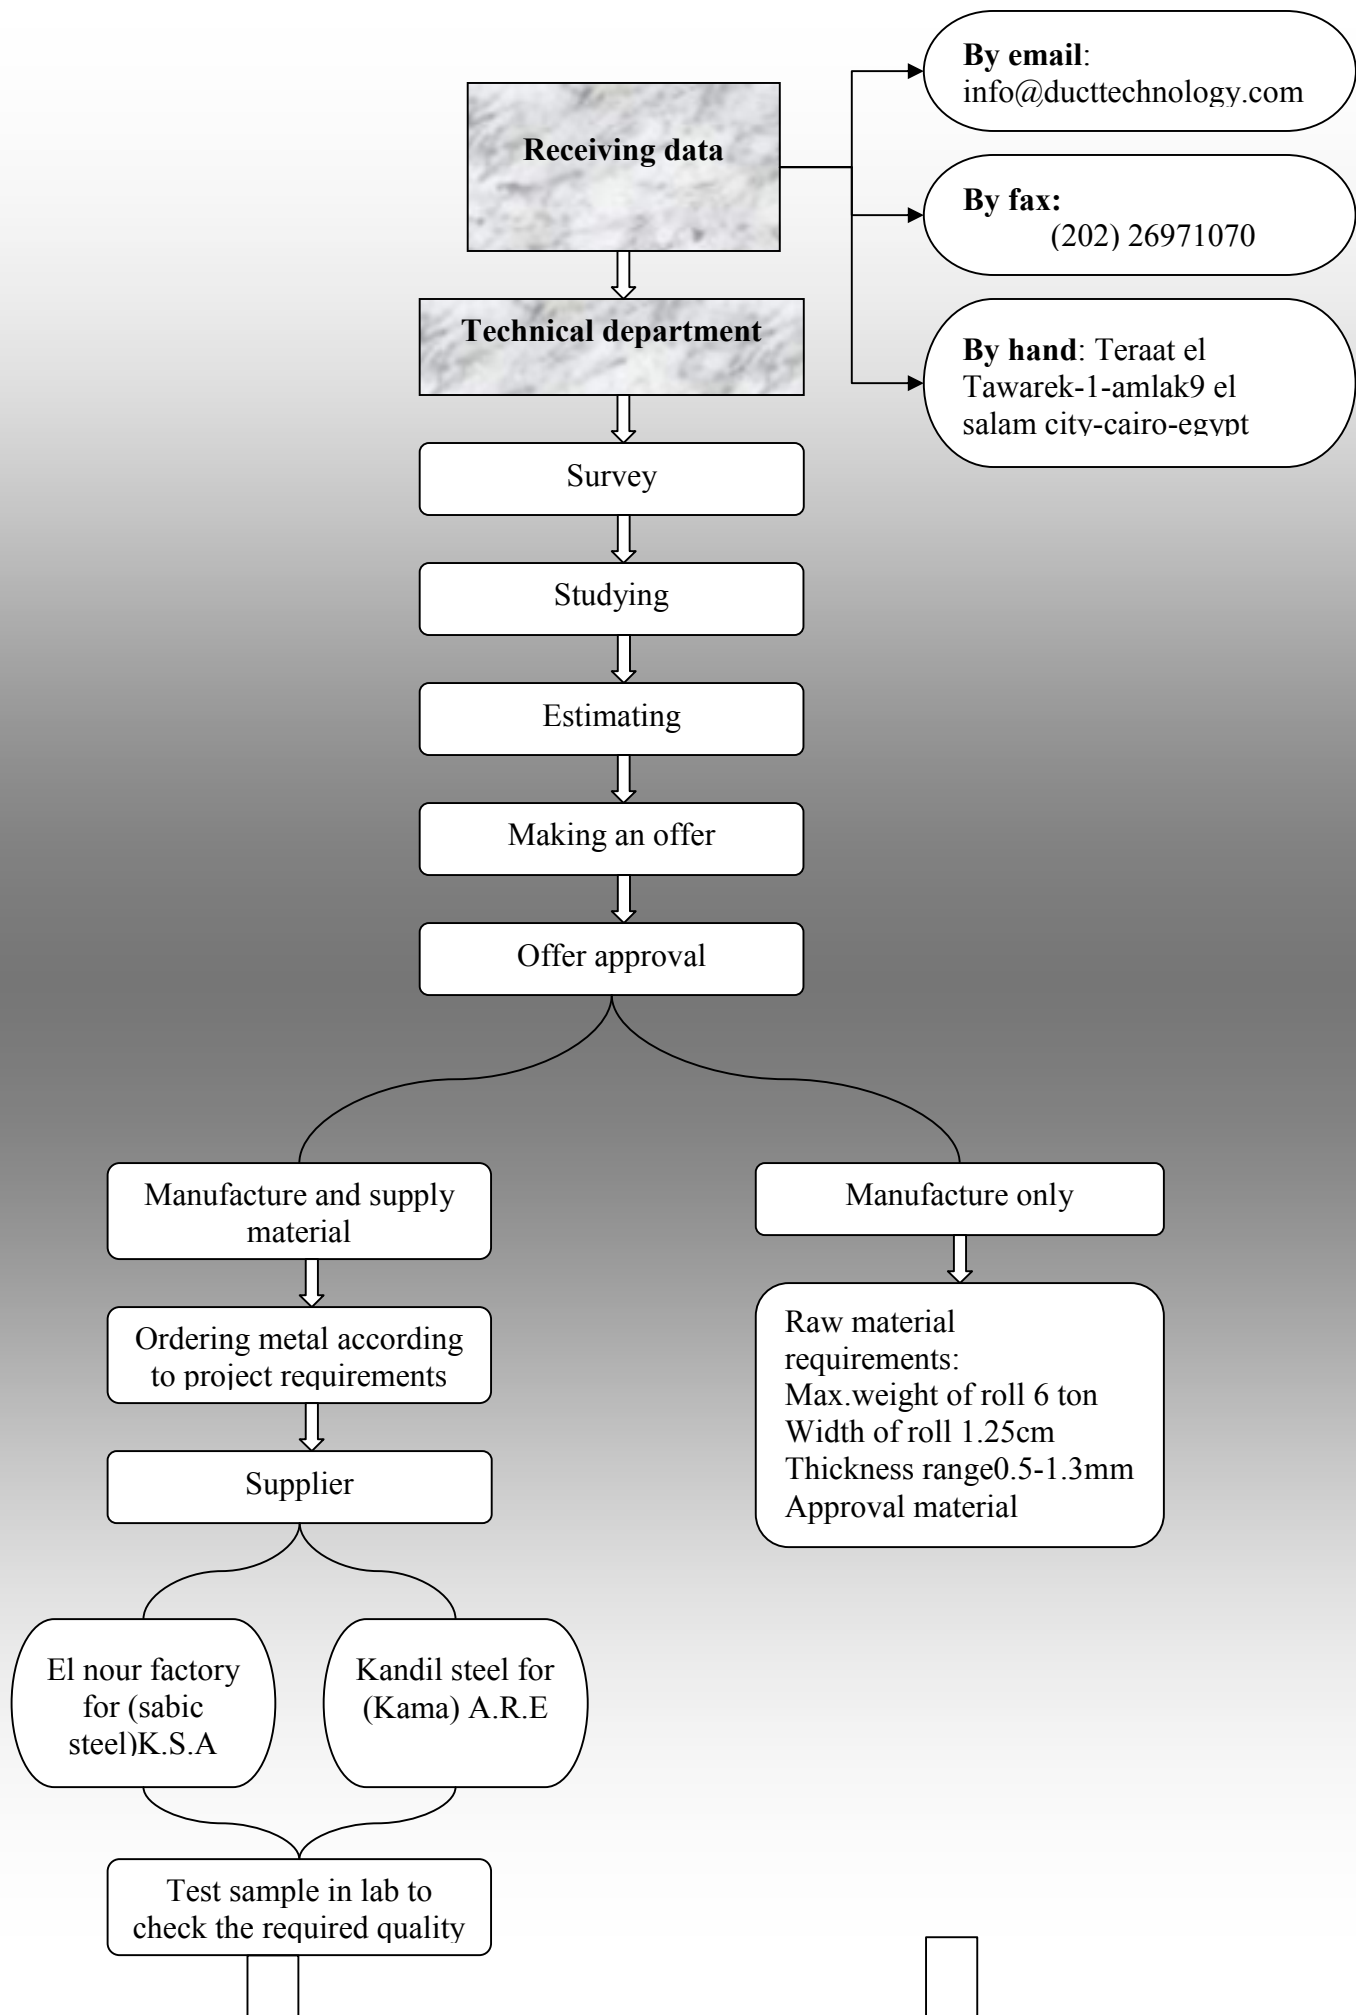

Duct Technology is a soul agent for PAL MIDDLE EAST PIR. LLC for Pre-insulated Ducting Technology.

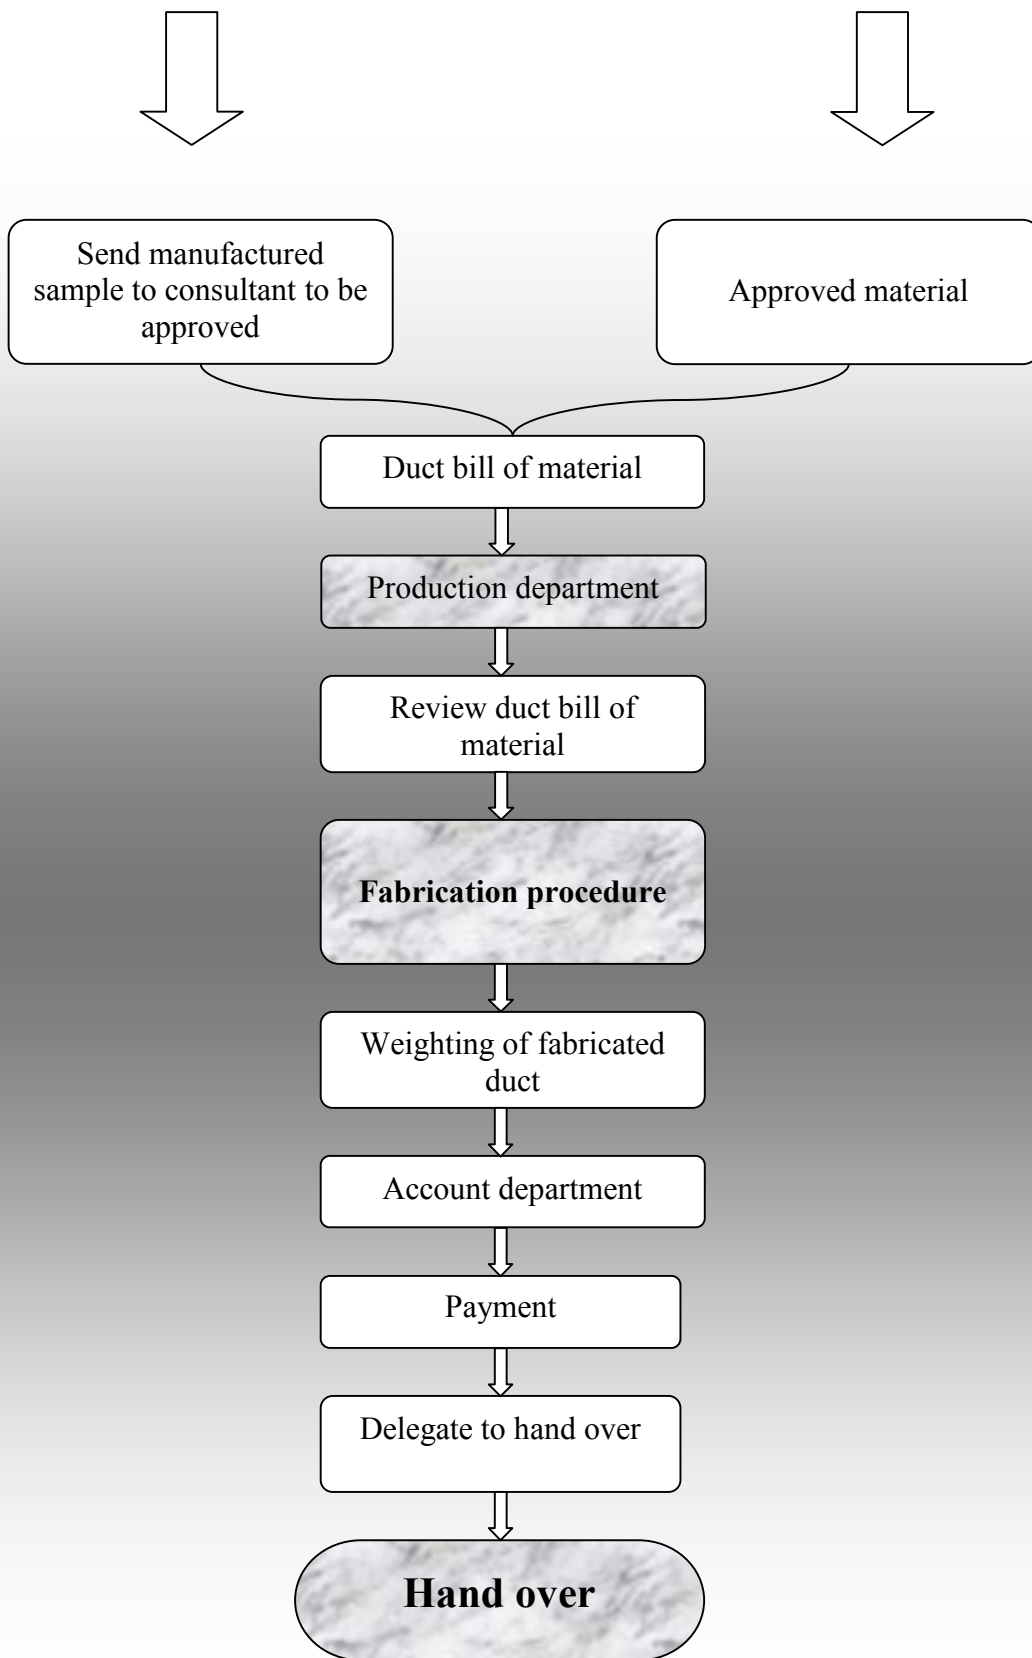

PAL complete system technology approach to pre-insulated duct work is the solution to today's air distribution problems.

Features:

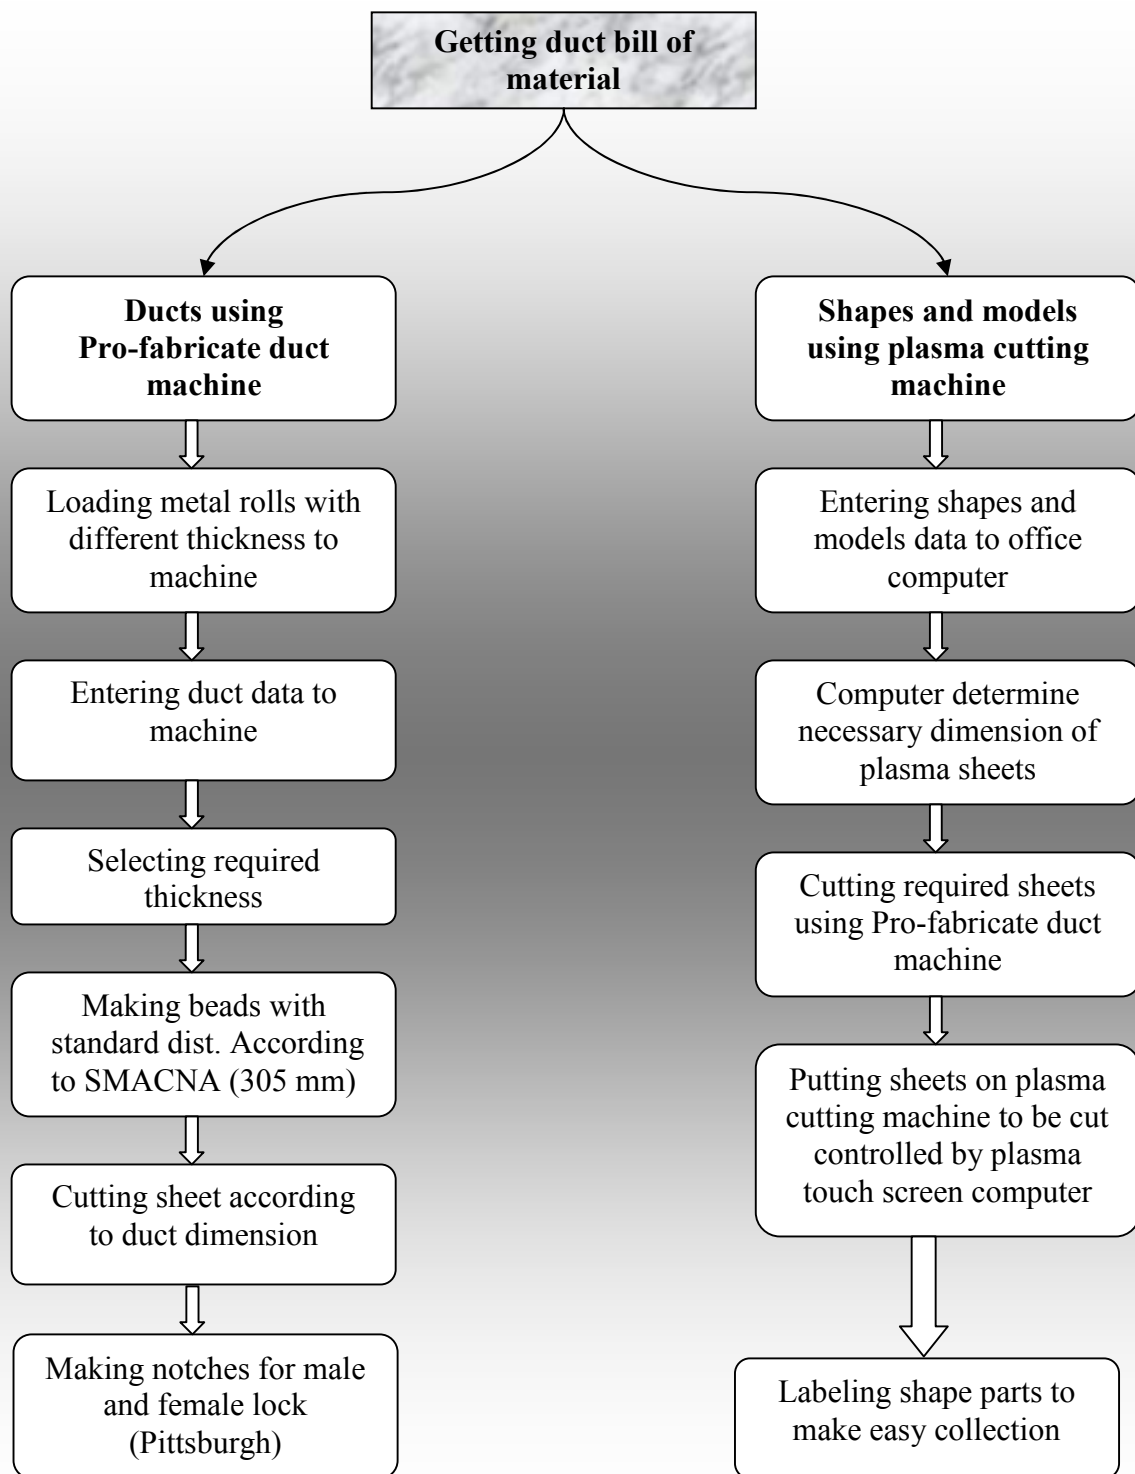

- **Cleanable and hygienic.**
- **Environmentally friendly, CFC, HCFC free.**
- **Clean Air: contains no micro fibers.**
- **Light weight: only 15% of sheet metal ducting.**
- **Resistance to fungus growth.**
- **Space saving: flush fitting installation possible.**
- **Low leakage: A fully sealed system conforms to DW 144 class C- high pressure.**
- **Low (U) Value.**
- **Fast track installation.**
- **No limits to duct sizes.**
- **High-compressive strength.**

Recommendation Certificates

TO WHOM IT MAY CONCERN

This is to certify that **Two Wires** has successfully completed the electric & low current works for Citibank office building at new Cairo project.

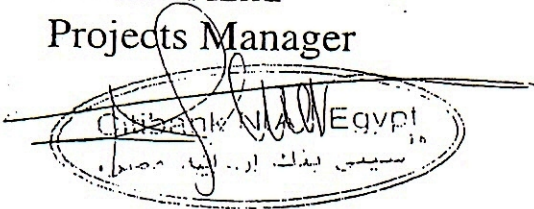

Two Wires has shown a great level of cooperation and technical professionalism in Citiplan project.

Two Wires contribution was instrumental to overall success of the project. We highly recommend them.

This certificate has been issued upon Two Wires request with no responsibility to our firm.

Citibank N. A, Egypt

Ahmed Azmi
Projects Manager

To whom it may concern

Uhde GmbH, a member of the ThyssenKrupp group of companies, is contracted by EPPC to construct an PDH/PP Complex Factory in Port Said, Egypt.

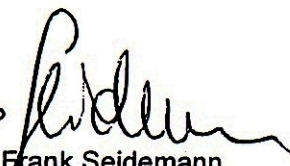

During the period of commissioning work of the HVAC systems **Two Wires** has successfully completed the Air flow Measurements of the different HVAC systems.

The work showed the application of technical and quality standards. **Two Wires** proved to be experienced, co-operative and capable to emit the assigned responsibilities.

Our joint work and meetings are impressed by a fruitful and successful co-operation atmosphere on an high technical level standard.

Due to the quality of Air flow Measurements we highly recommend them.

This certificate has been issued upon **Two Wires's** request with no responsibility to our company.

RE: REF PROJECTS FOR 2 WIRES Co.

Dear Sir,

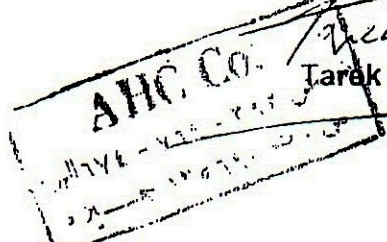

With ref. to the above-mentioned subject we would like to declare that 2 wires had been involved in some of our projects and have done a very professional, respective work in the expected period of time.

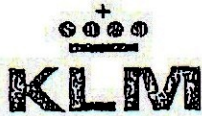

This has been achieved during the last 7 years in the following projects.

No.	Project Name
1	CIB Giza Branch
2	Sonesta Hotel-Cairo
3	مبنى الرقابة الإدارية (الأسكندرية)
4	مبنى وزارة الثقافة (الأوبرا)

This certificate was given to 2 wires upon their request with no legal obligation

Sincerely Yours

Tarek Fathey

Royal Dutch Airlines

TO WHOM IT MAY CONCERN

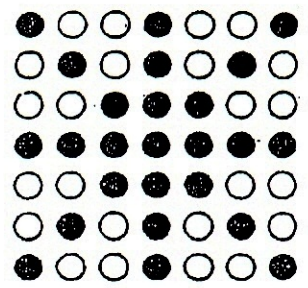

September 1997

During the complete renovation of our office, Engineer Ossama Adib was responsible for all the works concerning electricity, air conditioning as well as the network for telephones and computers. The cooperation between Mr. Adib and ourselves was excellent.

Yours sincerely,

KLM Royal Dutch Airlines

J. W. Goudriaan
Marketing Manager Northern Africa

31 March 1993

This is to Certify that

Eng. Osama Adeeb Milad

participated in the restoration of the British Council office and
Library in Cairo during Ramadan 1993.

This Certificate is provided in recognition of the high standard
of his contribution and the special efforts he made in successfully
completing the work on time.

Representative of the British Council
in Egypt

ملحوظة : على جهات الإسناد التأكد من وجود علامة مائة للبطاقة

إلى السادة أصحاب الأعمال :

حررت هذه البطاقة طبقاً للقانون رقم (١٠٤) لسنة ١٩٩٢ بإنشاء الاتحاد المصري لمقاولي التشييد والبناء والقرار الوزاري رقم (١) لسنة ١٩٩٣ وتعديلاته باعتماد قواعد قيد وتصنيف وترتيب أعضاء الاتحاد المصري لمقاولي التشييد والبناء.

والقرار الوزاري رقم (٢٠٥) لسنة ١٩٩٣ بإصدار اللائحة التنفيذية للقانون رقم (١٠٤) لسنة ١٩٩٢.

يرجى الالتزام بما حدده القانون في هذا الشأن :

١- الحدود القصوى لقيمة المناقصات المسموح بدخوله فيها وفقاً لفئة تصنيفه بكل تخصص حسب الجدول المرفق، ويسمح بالتجاوز في حدود ١٥ ٪ من الحد الأعلى لكل فئة.

٢- يكون لصق تمغة الاتحاد إلزامياً على عقود المقاولات التي يوقعها عضو الاتحاد متى زادت على مائتي ألف جنيه بواقع نصف جنيه عن كل ألف جنيه بحد أقصى (٥٠٠٠ جنيه) خمسة آلاف جنيه للعقد الواحد أو سداد قيمتها للاتحاد بموجب إيصال معتمد منه، ويرفق بالعقد، ويرتبط التجديد السنوي لبطاقة العضوية بالالتزام بسداد قيمة التمغة المحددة وذلك طبقاً لنص المادة العاشرة من القانون رقم (١٠٤) لعام ١٩٩٢ والمادة الحادية عشرة من لائحته التنفيذية. الحدود العليا لقيمة المناقصات المسموح بالدخول فيها لكل فئة بكل تخصص (بالمليون جنيه)

التخصصات						
الأولى	الثانية	الثالثة	الرابعة	الخامسة	السادسة	السابعة
٢٠	٥٠	٣٠	٢٠	١٠	٤	٢
	٢٥	١٥	٨	٢	٠,٥	-
